

Software Developer – Server: C++, Java, Linux, Windows Server, Corba, etc.

Excellent opportunity for a seasoned programmer to join our growing team!

The Software Developer (Server side) will be working out of our Toronto, Canada office. This role will be focused on back-end server and application development.

North Plains is the leading provider of Digital Asset Management solutions for small to medium up to enterprise-wide / global implementations.

ESSENTIAL FUNCTIONS:

- Actively participate in the engineering and design process.
- Design, develop, test, implement, and document software according to the technical specifications.
- Debug software problems and implement fixes in a timely manner.
- Assist technical support in resolving internal and external customer related problems. Provide support with other development groups, as needed.
- Provide team leader with written reports based on project details and status/development issues. Meet with other engineers to discuss knowledge and information regarding project status and development issues.
- Special projects as assigned.

SKILL REQUIREMENTS:

- Bachelor Science (B.Sc.) in Computer Science or equivalent experience
- 8+ years hands-on Server Side Development Experience with strong knowledge in: **Linux (Red Hat 5+ or CentOS 4+ preferred), Windows Server 2005/2008/2008R2, Java, C++, Corba, etc**
- Experience with High-Performance Unix/Linux Programming.
- DBMS – Oracle 10g/11g and/or SQL Server 2008
- Some experience with WebObjects and Solaris x86
- Practical knowledge of the full software development life cycle.
- Solid Understanding of Data Structures, Algorithms, and Object-Oriented design.
- Working knowledge of Systems Programming (e.g. threads, sockets)
- Practical Experience with Unit/Regression Testing
- Analytical and problem solving skills necessary to design and debug complex client/server software applications.
- Experience with the Scrum/Agile development process
- Excellent teamwork and interpersonal skills with proven ability to influence cross-functional teams
- Ability to coach and mentor junior team members

ADDITIONAL REQUIREMENTS

- Strong preference is for candidates located in GTA. (Overseas candidates will not be considered)
- Nice to have: Understanding of digital asset management, content management, and/or publishing industries.
- Nice to have: Experience with ImageMagik, QuickTime, Stellant, Equilibrium, Digimarc (not required, but will help for this role)
- Nice to have: Mobile/Tablet development experience
